| PROJECT | Warehouse Bar & Grille Boston, MA |
| DETAILS | K-13 Gray 3600 Sq. Ft. @ 1" Thick |
| ARCHITECT | Donald Lang Newton, MA |

Warehouse Bar and Grille is a masterful fusion of an upscale eatery and neighborhood sports bar. Warehouse features an enticing menu of market fresh items and gastropub fare in a stylish and inviting environment making it the ideal place for business lunches, sporting events, happy hour, and Sunday brunch. Architect Donald Lang, of Newton, Massachusetts, designed Warehouse with edgy details including concrete flooring, industrial lighting, open ductwork, and metal accents which contribute to the restaurant's sleek yet, contrasting atmosphere.

To prevent the restaurant from sounding like a real warehouse, K-13 Gray was applied to the open truss ceiling to improve the ambient sound. K-13 absorbs echo, reverberation, and unwanted noise produced by numerous hard surfaces throughout the restaurant. In addition to acoustic performance, the application of K-13 Gray completes the industrial, bold design.

K-13 provides exceptional acoustic and thermal insulation and is a superior choice for your new construction or renovation project. It is available in standard and custom colors and can adhere to virtually any substrate configuration. K-13 is manufactured by International Cellulose Corporation, the industry's leading developer and manufacturer of spray-applied cellulose thermal and acoustical finishes.

Contact International Cellulose Corporation today at (800) 444-1252 or visit us online at www.spray-on.com for complete details on how ICC can improve your building projects. ICC also offers architects an AIA/CES HSW SD Lunch N Learn program both live and on-line on the subject of Solving Architectural Noise Problems.
